

Roxen CMS 5.0

Roxen CMS is a powerful and versatile Content Management System. It comes with a variety of functions pre-packaged. The Start Package contains everything you need for developing and launching complex and multinational web sites – all out of the box. In addition we offer a long list of add-on modules, and there is always the option to develop new modules yourself. There are no limits to what you can do.

Start Package

The Roxen CMS Start Package includes everything you need to get up and running. There are two package variants – one for building an Intranet site and another for an Internet/Extranet site.

Intranet Start Package

- One server
- Unlimited number of web sites
- Unlimited number of users

Internet/Extranet Start Package

- One server
- Unlimited number of web sites
- 10 editors

Regardless of which variant you choose you get a full-featured product with an easy-to-use interface. Here is an overview of the functionality contained in Roxen CMS:

- Content authoring tools
- Desktop integration
- Access control
- Native, ODBC and JDBC database interfaces
- Advanced version control
- XSLT templates
- Search engine
- Poll

In addition, the Start Package includes a pre-configured web site with login functionality, basic layout templates, navigation menus and the search engine ready for use out of the box. This lets you kick-start your site development and have people publish content right away.

The product ships with all necessary components such as database engine and Java runtime environment and a typical system installation takes less than half an hour.

Add-On Modules

The customization capabilities in Roxen CMS is one of the product's standout features. There is a large selection of add-on modules that you can choose from:

- Workarea Staging
- Workflow
- LogView Analyzer
- Active Directory Integration
- Windows NTLM Single Sign-On
- Categorization
- Site Index/Keywords
- Forms & Response
- Forum
- Bookings
- Calendar
- Newsletter
- Blog

Straightforward Licensing Model

Roxen's philosophy is that you should be free to change your operating system platform, upgrade your hardware and increase your site's traffic without worrying about license restrictions. This means that in the Roxen pricing model you are not charged by how many web sites you deploy, site size, traffic volume or number of visitors. You are allowed to install one Roxen CMS license on one server with two CPUs, running as many web sites as you wish with any number of visitors.

Our model is based on uncomplicated parameters such as how many servers you need, how many editors that have editing and login permissions and which add-on modules you want to enable. Based on your needs, servers have different roles in a software installation – edit server, acceleration frontend, archive server or developer setup. You add servers only for increased performance or redundancy.

Easily Add Capacity and Functionality

The configuration as well as the add-on modules are all controlled by a license key that you can update at any time without reinstalling the software. This gives great flexibility in tailoring Roxen CMS to your needs.

Support and Maintenance

Roxen customers with a support contract get unlimited product support via e-mail and telephone. In addition, all new releases and maintenance updates are included in the annual support fee.

As a Roxen customer you are welcome to take advantage of the Roxen Support extranet where you can access a number of services:

- Handle your support tickets
- View status for all tickets related to your organization regardless of originating person
- Download new releases and patches
- Find product information
- Access documentation, manuals and FAQ
- Upload and download files in a file area
- Register for our mailing list where you can discuss with other Roxen CMS customers

Roxen CMS is a world-class product – the support we offer our customers is equally first-rate.
